

- **5 Times faster** than previous systems for TCXO perturbation testing
- **4 Disc Pallet system** holds up to **640 crystals** per run
- **Example throughput:**
 - * -40° C to +80° C
 - * **289 measurements** on each crystal
 - * **Total test time only 7 hours**

Typical crystal plot showing deviation from curvefit

- **Extensive report generation, including group plots**

All crystals that pass QC limits
